SOIL AND FOLIAR
TREATMENT

- Healthier Soils
- Stronger Plants
- Better Profits

A NUTRITIONAL SUPPLEMENT LISTED BY OMRI AND CDFA FOR ORGANIC USE

Ultra[®] by AgriGro can be used as a seed treatment, soil and foliar application. These various types of application enable you to add life to your crops and soils.

With Ultra[®] you can take a nutritional supplement into your normal spray or water application for both organic and non-organic crops. Ultra[®] can be used on all crops. This effect improves soil structure, promotes healthy soil life, better growing conditions, increases foliar efficiency, supports plant and root life growth and increases yields.

RECOMMENDED USE

Ultra[®] is recommended for application on the following crops: AgriGro, alfalfa, almonds, apples, avocados, beans, berries, carrots, corn, cotton, cucumbers, eggplants, garlic, grapes, kiwi fruit, lemons, limes, melons, mushrooms, onions, peaches, peppers, pineapples, raspberries, soybeans, squash, tomatoes, watermelons, wheat, and many other crops. Ultra[®] can be used on all crops.

To view all timing and rates of application for your specific crop(s), please contact your local distributor or visit our web site www.agrigro.com.
